PRINCIPAL OFFICE

Grantsburg, Wi 54840

FOR THE YEAR ENDED

December 31, 2003

# ELECTRIC, WATER, OR GAS UTILITY

TO

# PUBLIC SERVICE COMMISSION OF WISCONSIN

P. O. Box 7854 Madison, WI 53707-7854 (608) 266-3766

This form is required under Section 196.07, Wis. Stats. Failure to file the form by the statutory filing date can result in the imposition of a penalty under Section 196.66, Wis. Stats. The penalty which can be imposed by this section of the statutes is a forfeiture of not less than \$25 nor more than \$5,000 for each violation. Each day subsequent to the filing date constitutes a separate and distinct violation. The filed form is available to the public and personally identifiable information may be used for purposes other than those related to public utility regulation.

# INSTRUCTIONS FOR FILING THE FERC FORM NO. 1

#### GENERAL INFORMATION

#### I. Purpose

This form is a regulatory support requirement (18 CFR 141.1). It is designed to collect financial and operational information from major electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. This report is also secondarily considered to be a non-confidential public use form supporting a statistical publication (Financial Statistics of Selected Electric Utilities), published by the Energy Information Administration.

### II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 CFR 101) must submit this form.

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

- (1) One million megawatt hours of total annual sales,
- (2) 100 megawatt hours of annual sales for resale,
- (3) 500 megawatt hours of annual gross interchange out,
- (4) 500 megawatt hours of wheeling for others (deliveries plus losses).

### III. What and Where to Submit

(a) Submit an original and six (6) copies of this form to:

U.S. Department of Energy Energy Information Administration EI-541 Mail Station: BG-094 Forrestal Building Washington, D.C.

Retain one copy of this report for your files.

(b) Submit immediately upon publication, four (4) copies of the latest annual report to stockholders and any annual financial or statistical report regularly prepared and distributed to bondholders, security analysts, or industry associations. (Do not include monthly and quarterly reports. If reports to stockholders are not prepared, enter "NA" in column (d) on Page 4, List of Schedules.) Mail these reports to:

Chief Accountant

Federal Energy Regulatory Commission

825 N. Capitol St., N.E.

Room 946

Washington, D.C. 20426

- (c) For the CPA certification, submit with the original submission, or within 30 days after the filing date for this form, a letter or report:
  - (i) Attesting to the conformity, in all material aspects, of the below listed (schedules and) pages with the Commission's applicable Uniform Systems of Accounts (including applicable notes relating thereto and the chief accountant's published accounting releases), and
  - (ii) Signed by independent certified public accountants or an independent licensed public accountant, certified or licensed by a regulatory authority of a State or other political subdivision of the U.S. (See 18 CFR 41.10-41.12 for specific qualifications.)

	Reference
Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

When accompanying this form, insert the letter or report immediately following the cover sheet.

#### **GENERAL INFORMATION (Continued)**

III. What and Where to Submit (Continued)

(c) (Continued)

Use the following form for the letter or report unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

In connection with our regular examination of the financial statement of for the year ended on which we have reported separately under date of we have also reviewed schedules of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered neccesary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

State in the letter or report, which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(d) Federal, State and Local Governments and other authorized users may obtain additional blank copies to meet their requirements free of charge from:

U.S. Department of Energy National Energy Information Center Energy Information Administration Washington, D.C. 20585 (202) 586-8800

IV. When to Submit:

Submit this report form on or before April 30th of the year following the year covered by this report.

### **GENERAL INSTRUCTIONS**

- I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR 101) (U.S. of A.). Interpret all accounting words and phrases in accordance with the U.S. of A.
- II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting year and use for statement of income accounts the current years amounts.
- III. Complete each question fully and accurately, even if it has been answered in a previous annual report. Enter the word "None" where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to the respondent, either
  - (a) Enter the words "Not Applicable" on the particular page(s), or
  - (b) Omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2, 3, and 4.
- V. Complete this report by means which result in a permanent record. Complete the original copy in permanent black ink or typewriter print, if practical. The copies, however, may be carbon copies or other similar means of reproduction provided the impressions are clear and readable.

CENERAL	INSTRUCTIONS	(Continued)

- VI. Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" at the top of each page is applicable only to resubmissions (see VIII. below).
- VII. Indicate negative amounts (such as decreases) by enclosing the figures in parenthesis. ( ).
- VIII. When making revisions, resubmit only those pages that have been changed from the original submission. Submit the same number of copies as required for filing the form. Include with the resubmission the Identification and Attestation page, page 1. Mail dated resubmissions to:

Chief Accountant Federal Energy Regulatory Commission 825 North Capitol Street, N.E. Room 946 Washington, D.C. 20426

- IX. Provide a supplemental statement further explaining accounts or pages as necessary. Attach the supplemental statement (8 1/2 by 11 inch size) to the page being supplemented. Provide the appropriate identification information, including the title(s) of the page and the page number supplemented.
- Do not make references to reports of previous years or to other reports in lieu of required entries, except as specifically authorized.
- XI. Wherever (schedule) pages refer to figures from a previous year, the figures reported must be based upon those shown by the annual report of the previous year, or an appropriate explanation given as to why the different figures were used.
- XII. Respondents may submit computer printed schedules (reduced to 8 1/2 by 11) instead of the preprinted schedules if they are in substantially the same format.

### DEFINITIONS

- I. Commission Authorization (Comm. Auth.) The authorization of the Federal Energy Regulatory Commission,
  or any other Commission. Name the Commission whose authorization was obtained and give date of the
  authorization.
- II. Respondent The person, corporation, licensee, agency, authority, or other legal entity or instrumentality in whose behalf the report is made.

### EXCERPTS FROM THE LAW

### Federal Power Act, 16 U.S.C. 791a-825r)

- "Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to wit:
  ...(3) 'corporation' means any corporation, joint-stock company, partnership, association, business trust,
  organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any
  of the foregoing. It shall not include 'municipalities' as hereinafter defined;
  - (4) 'person' means an individual or a corporation;
- (5) licensee' means any person, State, or municipality licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;
- (7) 'municipality' means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the laws thereof to carry on the business of developing, transmitting, utilizing, or distributing power;..."
- (11) 'project' means a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or forebay reservoirs directly connected therewith, the primary line or lines transmitting power therefrom to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, lands, or interest in lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

#### **EXCERPTS FROM THE LAW (Continued)**

"Sec. 4. The Commission is hereby authorized and empowered-

(a) To make investigations and to collect and record data concerning the utilization of the water resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites,... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304.(a) Every licensee and every public utility shall file with the Commission such annual and other periodic or special reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies."

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, amend, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the form or forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed..."

#### **GENERAL PENALTIES**

"Sec. 315.(a) Any licensee or public utility which willfully fails, within the time prescribed by the Commission, to comply with any order of the Commission, to file any report required under this Act or any rule or regulation of the Commission thereunder, to submit any information or document required by the Commission in the course of an investigation conducted under this Act,... shall forfeit to the United States an amount not exceeding \$1,000 to be fixed by the Commission after notice and opportunity for hearing..."

me of Respondent rth Central Power Co., Inc.	This Report Is:   (1) [X] An Original   (2) [ ] A Resubmission	Date of Report   (Mo, Da, Yr)	Year of Report     December 31, 2003						
	IMPORTANT CHANGES DURING TO	HE YEAR (Continued)	December 31, 2003						
9. The Company petitioned the PSCW on October 2, 2000 to abandon the Grimh hydroelectric generating facility at Radisson. PSC Order #4190-EA-100 was issued March 27, 2001 to abandon Grimh Dam. The Company is in negotiations to sell the dam. The Company has been orderd to rebuild or remove the dam by the Department of Natural Resources. Engineering plans to remove are completed and filed with the DNR for approval. A lawsuit by landowners to make the Company rebuild the dam and restore flowage elevation was filed against the Company in September, 2002. This was dismissed in June, 2003 because of proceedings before the DNR. A hearing will be held as a contested case before the DNR.									
. None									
Rate case was filed March 18, 2003 requesting 8.15 % increase. Rate Order #4190-ER-103 was issued January 3 2004 applicable to service rendered on or after February 16, 2004. The order authorized rates of return at 9.45% on average investment and 12.7% on average equity.

### STATEMENT OF INCOME FOR THE YEAR

- 1. Report amounts for accounts 412 and 413, Revenue and Expenses from Utility Plant Leased to Others, in another utility column (i, k, m,o) in a similar manner to a utility department. Spread the amount(s) over lines 01 thru 24 as appropriate. Include these amounts in columns (c) and (d) totals.
- 2. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
- 3. Report data for lines 7, 9, and 10 for Natural Gas companies using accounts 404.1, 404.2, 404.3, 407.1, and
- 4. Use page 122 for important notes regarding the statement of income or any account thereof.
- 5. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in a material refund to the utility with respect to power or gas purchases. State for each year affected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power and gas purchases.
- 6. Give concise explanations concerning significant

### STATEMENT OF CASH FLOWS

- 1. If the notes to the cash flow statement in the respondents annual stockholders report are applicable to this statement, such notes should be attached to page 122. Information about noncash investing and financing activities should be provided on page 122. Provide also on page 122 a reconciliation between "Cash and Cash Equivalents at End of Year" with related amounts on the balance sheet.
- 2. Under "Other" specify significant amounts and group others.
- 3. Operating Activities Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show on page 122 the amounts of interest paid (net of amounts capitalized) and income taxes paid.

#### **NOTES TO FINANCIAL STATEMENTS**

- 1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
- 2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
- 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the

- year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
- 5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
- 6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be attached hereto.

See Auditor's Notes Attached

### NOTES TO FINANCIAL STATEMENTS

December 31, 2003 and 2002

## (1) THE ENTITY

North Central Power Co., Inc. is a public utility providing electric service to customers in 23 townships and villages of north central Wisconsin, with its headquarters in Radisson, Wisconsin. The company is regulated by the Wisconsin Public Service Commission, and therefore subject to fixed billing rates except as modified by properly approved rate cases filed before the Commission. Tariffs of the Company are designed by the Public Service Commission to provide for a return to the Company of all allowable costs, as well as an approved return on stockholders equity.

# (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of North Central Power Co., Inc. is presented to assist in understanding the Company's financial statements. The financial statements and notes are representations of the Company's management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

### (a) Utility plant is stated at cost.

Depreciation has been computed using straight-line rates prescribed by the Wisconsin Public Service Commission for this Company, applied to the various classes of depreciable property on a half-year convention. Depreciation expense is adjusted for the normalization of tax savings resulting from the use of accelerated cost recovery methods on corporate income tax returns.

It is the general policy of the Company to charge the cost of repairs and minor replacements to the appropriate operating expense and to capitalize the cost of renewals and betterments. The recorded cost of depreciable plant retired, or otherwise disposed of, and the cost of removal, less salvage, is charged to accumulated depreciation.

- (b) Accounts receivable are reported on the balance sheet net of reserves for uncollectible accounts. These reserves are based on managements evaluation of the receivables after bad debt write-offs, and represent approximately 1.5% of outstanding customer accounts. Service charges are added monthly to accounts over 30 days old, with this income recognized currently. When accounts are deemed uncollectible by management, they are written off as bad debts at actual value including accrued service charges.
- (c) Unbilled revenues represent the proportionate share of January, 2004 and 2003 billings related to estimated energy supplied during December, 2003 and 2002.
- (d) Inventories of materials and supplies are recorded at average cost and merchandise inventories at cost. Use of inventoried items is recorded on the first in, first out basis.

### NOTES TO FINANCIAL STATEMENTS

December 31, 2003 and 2002

#### SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued (2)

- Deferred charges include bond issuance expenses which are being amortized over the lives of the issues to which they pertain. The Company's utility operations are also subject to the provisions of SFAS 71, 'Accounting for the Effects of Certain Types of Regulation'. Also included as deferred charges are capitalized costs which are probable of recovery in future rates. (see Note
- (f) Earnings per share of common stock are computed on the basis of the number of shares outstanding at the end of the year.

するから、多数ないのではないできょうないとのできないできない。 こうしゅうしゅう こうしゅうしゅう

- The Company follows the practice of amortizing Federal investment tax credits over the life of the respective assets.
- JARRES 1 1887 2 15 1 The Company follows the accrual basis method of accounting, wherein revenues are recorded (h) when earned and expenditures when incurred.
- The preparation of financial statements in conformity with generally accepted accounting (i) principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.
- The Company considers all investments with maturities of three months or less to be cash **(i)** equivalents.
- The Company expenses advertising costs as they are incurred. Advertising expenses for the years (k) ended December 31, 2003 and 2002 were \$4,940 and \$4,997. The second of th

and the second of the second o	\$ 626,987	\$ 1,710,000	\$2,336,987

### (5) OPERATING RATIOS

The ratio of operating earnings to average investment in net utility plant and materials inventory was 8.29% for 2003 and 8.98% for 2002. The net earnings represent a return on average stockholders' equity of 11.04% and 12.30% for the years 2003 and 2002 respectively. On January 6, 1998 the Public Service Commission of Wisconsin authorized the Company to earn 11.62% on average investment and 13.75% on average equity and authorized increases in the Company's electric rates which averaged 9.02%, effective with sales after that date.

### **NOTES TO FINANCIAL STATEMENTS**

December 31, 2003 and 2002

# (6) INCOME TAXES

Income tax provisions for the years 2003 and 2002 were computed as follows:

		2003		2002
Net income	. \$	280,552	\$	292,005
Federal income taxes		15,154		14,176
Contributions in Aid of Construction, net		114,460		77,548
Other adjustments		100		100
Amortized ITC	(	4,013)	(	5,072)
Depreciation and timing adjustments	(	332,010)	(	309,943)
Accrued employee benefits		4.886		7,438
Taxable income	<u>\$</u>	79,129	9	\$ 76,252

THE STATE OF THE PROPERTY OF T

Standard Federal and State income tax rates resulted in income tax liabilities as follows:

	2003	2002
Income tax liability	\$ 44,490	\$ 43,476
Allocated to non-operating items	· -	134
Allocated to contributions for construction	( 39,753)	( 18,808)
Allocated to employee benefits	( 3,152)	( 4,799)
Allocated to depreciation	140,294	143,105
Income taxes charged to operations	\$ 141,879	\$ 223,988

### (7) CREDIT RISKS

At December 31, 2003, 12.01% of the Company's trade receivables were aged over 90 days. At December 31, 2002, 11.17%.

Also, at December 31, 2003 the Company had deposits of \$190,946 in one bank. With FDIC insurance at \$100,000, this leaves \$90,946 uninsured. At December 31, 2002 the uninsured amount with this bank was \$-0-.

# NOTES TO FINANCIAL STATEMENTS

December 31, 2003 and 2002

# (8) DEFERRED TAXES

Corporate taxes are paid on customer contributions in aid to construction in the year the contributions are received. These taxes are then amortized against current operations over the average life of the affected plant accounts.

Deferred tax debits are also recorded to recognize the tax attributes of accrued employee benefit liabilities recognized on the financial statements but not deducted for tax purposes.

	<u>CIAC</u>	EMPLOYEE BENEFITS	TOTAL
December 31, 2001	\$ 416,770	\$ 17,675	\$ 434,445
Additions Amortization	37,785 (18,977)	4,799	42,584 ( <u>18,977</u> )
December 31, 2002	435,578	22,474	458,052
Additions Amortization	60,473 ( <u>20,720</u> )	3,152	63,625 ( <u>20,720</u> )
December 31, 2003	<u>\$ 475,331</u>	<u>\$ 25,626</u>	\$ 500,957

Depreciation adjustments between tax methods and book charges result in income tax effects. These income tax effects are recorded as deferred tax credits. Also, in 1987, the federal corporation income tax rate change caused necessary adjustments to book/tax depreciation income tax effects for 1981-1986. This rate change adjustment is being amortized over the lives of each plant account.

		-

December 31, 2003	\$	750,699

The net effect of all deferred tax entries, at December 31, 2003 and 2002 was \$249,742 and \$152,353.

### NOTES TO FINANCIAL STATEMENTS

December 31, 2003 and 2002

# (9) PENSION PLANS

The company maintains a non-contributory defined benefit pension plan which covers all full-time employees of eligible age. Annual contributions are determined by actuarial valuations prepared by an independent consultant, and are based upon a frozen entry age normal funding method. Required contributions for 2003 and 2002 were \$64,046 and \$54,645. All contributions are paid to and invested by the Travelers Insurance Company.

At December 31, 2003, the current value of plan assets was \$679,666 while the projected benefit obligation was \$796,195; this deficit of \$116,529 is reduced by unrecognized transition amount of \$113,152, unrecognized prior service cost of \$72,438 and unrecognized net gain of (\$8,711) to leave an unrecorded prepaid pension cost of \$77,772. Relevant factors used in determining the projected benefit obligation are discount rate at 7.50%, expense loading at 3.0%, and retirement age at 65. Annual wage increases are projected at 5.5%, and the long-term rate of return is estimated at 7.50%. Benefits to retirees are calculated at 1.5% of the employees average monthly earnings at the determination date, multiplied by years of service since May 1, 1973. All benefits are funded through allocated insurance contracts, leaving the Company with no liability to the plan once a retiree is annuitized.

Valuation of the defined benefit plan by the terms of SFAS 87 results in net periodic pension costs for the years 2003 and 2002 that differ from actuarially computed contributions. For those years, service cost of \$45,778 and \$41,570, interest cost of \$52,415 and \$45,020, return on assets of (\$32,295) and (\$30,750), and net amortization and deferral of (\$8,306) and of (\$3,534) result in net periodic pension costs of \$57,592 and \$52,306. The projected benefit obligation was \$796,195 and \$684,207 at December 31, 2003 and 2002 while the fair value of plan assets was \$679,666 and \$588,670. While the projected benefit obligation does exceed the fair value of plan assets, that fair value does exceed the accumulated benefit obligation and the vested benefit obligation.

The Company also maintains a defined contribution 401K pension plan. Employee contributions to this plan are partially matched by Company contributions. Beginning July, 1999, for each dollar of employee contribution up to a maximum of 5% of employee payroll, the Company adds 2% to the contribution. The Company's exposure is a maximum of .1% of employee payroll. This plan is available to all full time Company employees. Contributions are all deposited with an outside plan trustee, who is responsible for all investing, payment of proceeds, and reporting. Company matching contributions for 2003 and 2002 were \$5,568 and \$5,441.

# **NOTES TO FINANCIAL STATEMENTS**

December 31, 2003 and 2002

### (10) REGULATORY MATTERS

Provisions of SFAS 106 caused the Company to quantify its post retirement benefits other than pensions. The Company maintained only one plan, a supplemental health insurance benefit plan, which was cancelled April 1, 1993. At December 31, 2003, the present value of the post retirement benefits expected to be paid was \$5,090, and at December 31, 2002 \$5,526. This amount is recorded as a liability under 'employee benefits' and the offsetting entry is to 'regulatory asset'. This 'regulatory asset' represents expenses which the Company will be allowed to recover in future revenue rates. The cost recognized during 2003 and 2002 under this plan was \$864 each year.

STATES OF THE PROPERTY OF THE

The Company capitalizes as deferred charges costs which have been incurred which are probable of recovery in future rates. A detail of deferred charges follows:

	2003	2002
Grimh dam licensing Grimh dam unrecovered cost	\$ 0 104,718	\$ 0 86,204
	<u>\$104,718</u>	\$ 86,204

Also included in deferred charges are unamortized debt issuance expenses of \$24,987 and \$33,188 in 2003 and 2002.

### (11) EQUITY RESTRICTIONS

The Series D bond indenture requires that while these bonds are outstanding, the Company will maintain funded debt at a level no greater than 65% of total capitalization; the Company will maintain tangible net worth of not less than \$1,300,000; and that the Company will not pay dividends in excess of 85% of accumulated net income after December 31, 1993. No violations of these restrictions have occurred.

The series E bond indenture requires that while these bonds are outstanding, the Company will maintain funded debt at a level no greater than 65% of total capitalization; the Company will maintain tangible net worth of not less than \$2,000,000; the Company will make plant capital and maintenance expenditures that average at least two times the depreciation expense for any three year period; and that the Company will not pay dividends in excess of 85% of accumulated net income after June 30, 2002. No violations of these restrictions have occurred.

### NOTES TO FINANCIAL STATEMENTS

December 31, 2003 and 2002

# (12) GRIMH DAM

The Company closed on the sale of its hydraulic generation facilities in April, 2001. Only the Grimh dam remains an asset of the Company, since it is non-operational and was not desired by the buyers. Total sale price for the sale of these facilities was \$901,787, which resulted in a minimal loss of \$1,531 to the Company after closing costs and undepreciated plant were considered.

The Grimh dam has not been in service for the production of electricity since 1997. An order of abandonment has been approved by the Public Service Commission. An estimate of \$213,000 has been received for removal of the dam. The Company is prepared to give the dam plus \$213,000 to any interested party. The net book value of the Grimh dam has been removed from plant in service and was presented at December 31, 2001 as \$43,640 of deferred costs awaiting future rate recovery.

During 2002 and 2003 additional costs related to the Grimh dam have been incurred. A lawsuit has been filed, seeking to block the removal of the dam; \$24,785 in costs defending against this lawsuit have been incurred. In addition, costs related to the retirement of the dam and engineering services to prepare a removal plan have been incurred totaling \$36,293. At December 31, 2003, a total of \$104,718 of costs related to the Grimh dam have been deferred awaiting future rate recovery.

The lawsuit seeking to block removal of the dam has been dismissed on the grounds that the plaintiff's claims were premature in light of the pending Wisconsin Department of Natural Resources proceedings on the Company's proposal to remove the dam. It is anticipated that if the DNR approves the Company's dam removal plan, the plaintiffs will sue the company again, making similar claims. The Company's legal counsel is of the opinion that the plaintiff's case is without merit and that an unfavorable outcome would be unlikely. However, if the plaintiffs were to prevail, the damages could be substantial, especially if the court were to direct the Company to restore the Grimh dam to a condition that would bring the water level upstream back to its pre-drawdown level. An estimate of this cost has not been made.

### ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

- Explain in a footnote any important adjustments during year.
- Explain in a footnote any difference between the amount for book cost of plant retired, line 11, column (c) and that reported for electric plant in service, pages 204-207, column (d), excluding retirements of non-depreciable property.
- 3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is re-

FERC FORM NO. 1 (ED. 12-93)

moved from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.

4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

# MATERIALS AND SUPPLIES

- For Account 154, report the amount of plant materials and operating supplies under the primary functional classifications as indicated in column (a); estimates of amounts by function are acceptable. In column (d), designate the department or departments which use the class of material.
- 2. Give an explanation of important inventory adjustments during the year (on a supplemental page) showing general classes of material and supplies and the various accounts (operating expenses, clearing accounts, plant, etc.) affected - debited or credited. Show separately debit or credits to stores expense-clearing, if applicable.

## TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

- 5. If any tax (exclude Federal and State income taxes) covers more than one year, show the required information separately for each tax year, identifying the year in column (a).
- Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a footnote. Designate debit adjustments by parentheses.
- 7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
- 8. Enter accounts to which taxes charged were distributed in columns (i) thru (i). In column (i), report the amounts charged to Accounts 408.1 and 409.1 for Electric Department only. Group the amounts charged to 408.1, 409.1, 408.2 and 409.2 under other accounts in column (i). For taxes charged to other accounts or utility plant, show the number of the appropriate balance sheet account, plant account or subaccount.
- 9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

#### SALES OF ELECTRICITY BY RATE SCHEDULES (Continued)

- 1. Report below for each rate schedule in effect during the year the KWh of electricity sold, revenue, average number of customers, average KWh per customer, and average revenue per KWh, excluding data for Sales for Resale which is reported on pages 310-311.
- 2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," page 301. If the sales under any rate schedule are classified in more than one revenue account, list the rate schedule and sales data under each applicable revenue account subheading.
- 3. Where the same customers are served under more than one rate schedule in the same revenue account
- classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
- 4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
- 5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
- Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

	(1) [X] An Original	(Mo/Da/Yr)	
	(2) [ ] A Resubmission		December 31, 2003
	SALES FOR RESALE (Account 447)	- *	

- 1. Report all sales for resale (i.e. sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e. transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (pages 326-327).
- 2. Enter the name of the purchaser in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b) enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
- RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e. the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumer.
- LF for long-term firm service. "Long-Term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g. the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be

for long-term firm service which meets the definition RQ service. For all transactions identified as LF provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but less than five years,

SF- for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means longer than one year but less than five years.

#### SALES FOR RESALE (Account 447) (Continued)

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the length of the contract and service from designated units of less than one year. Describe the nature of the service in a footnote.

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

- 4. Group requirements RQ sales together and report them starting at line number one. After all RQ sales, enter "Subtotal RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal Non- RQ" in column (a) after this listing. Enter "Total" "Total" (a) as the last line of the schedule. Report subtotals and total for columns (g) through (k).
- In column (c), identify the FERC Rate Schedule or Tariff Number. On separate lines, list all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- 6. For requirements RQ sales and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is

the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.

- Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
- 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
- 9. The data in columns (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the last line of the schedule. The "Subtotal RQ" amount in column (g) must be reported as Requirement Sales For Resale on page 401, line 23. The "Subtotal Non-RQ" amount in column (g) must be reported as Non- Requirements Sales For Resale on page 401, line 24.
- Footnote entries as required and provide explanations following all required data.

The data on number of employees should be reported 3. The number of employees assignable to the electric for the payroll period ending nearest to October 31, department from joint functions of combination or any payroll period ending 60 days before or after utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of 2. If the respondent's payroll for the reporting equivalent employees attributed to the electric period includes any special construction personnel, department from joint functions. include such employees on line 3, and show the number of such special construction employees in a footnote. 1. Payroll Period Ended (Date) 11/01/03 2. Total Regular Full-Time Employees 14 3. Total Part-Time and Temporary Employees 8 4. Total Employees 22

Name of Respondent	This Report Is:   (1) [X] An Original	Date of Report:   (Mo/Da/Yr)	Year of Report:
North Central Power Co., Inc.	(2)[] A Resubmission	i	December 31, 2003

# PURCHASED POWER (Account 555) (Including power exchanges)

- Report all power purchases made during the year.
   Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
- 2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
- RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intend to remain reliable even under adverse conditions (e.g the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service which meets the definition of RQ service. For

- all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but less than five years.
- SF for short-term firm service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.
- LU for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission contraints, must match the availability and reliability of the designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means longer than ne year but less than five years.
- EX for exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.
- OS for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all nonfirm service regardless of the length

# PURCHASED POWER (Account 555) (Continued) (Including power exchanges)

of the contract and service from designated units of less than one year. Describe the nature of the service in a footnote.

AQ - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

- 4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
- 5. For requirements RQ purchases and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i)

the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.

- 7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (1) includes credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
- 8. The data in columns (g) through (m) must be totaled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on page 401, line 10. The total amount in column (h) must be reported as Exchange Received on page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on page 401, line 13.
- 9. Footnote entries as required and provide explanations following all required data.

# TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456) (Continued) (Including transactions referred to as "wheeling")

- 8. Report in column (I) and (j) the total megawatthours received and delivered.
- 9. In columns (k) through (n), report the revenue amounts as shown on bills or vouchers. In column (k), provide revenues from demand charges related to the billing demand reported in column (h). In column (l), provide revenues from energy charges related to the amount of energy transferred. In column (m), provide the total revenues from all other charges on bills or vouchers rendered, including out of period adjustments. Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on bills rendered to the entity listed in column (a).
- If no monetary settlement was made, enter zero ("0") in column (n). Provide a footnote explaining the nature of the nonmonetary settlement. Including the amount and type of energy or service rendered.
- 10. Provide total amounts in column (i) through (n) as the last line. Enter "TOTAL" in column (a) as the last line. The total amounts in columns (i) and (j) must be reported as Transmission Received and Delivered on page 401, line 16 and 17, respectively.
- Footnote entries and provide explanations following all required data.

Name of Respondent  North Central Power Co., Inc.	This Report is:	Date of Report:	Year of Report:
	(1) [X] An Original	(Mo/Da/Yr)	
	(2) [ ] A Resubmission		December 31, 2003
	ANSMISSION OF ELECTRICITY BY O	. ,	

- Report all transmission, i.e. wheeling, of electicity provided to respondent by other electric utilities, cooperatives, municipalities, or other public authorities during the year.
- 2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company; abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider.
- Provide in column (a) subheadings and classify transmission service purchased from other utilities as: "Delivered Power to Wheeler" or "Received Power from Wheeler."
- Report in columns (b) and (c) the total megawatthours received and delivered by the provider of the transmission service.
- 5. In columns (d) through (g), report expenses as shown on bills or vouchers rendered to the respondent. In column (d), provide demand charges. In column (e), provide energy charges related to the amount of energy transferred. In column (f), provide the total of all other charges on

- bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (f). Report in column (g) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero ("0") in column (g). Provide a footnote explaining the nature of the nonmonetary settlement, including the amount and type of energy or service rendered.
- 6. Enter "TOTAL" in column (a) as last line. Provide a total amount in columns (b) through (g) as the last line. Energy provided by the respondent for the wheeler's transmission losses should be reported on the Electric Energy Account, page 401. If the repondent received power from the wheeler, energy provided to account for losses should be reported on line 19, Transmission By Other's losses, on page 401. Otherwise, losses should be reported on line 27, Total Energy losses, page 401.
- Footnote entries and provide explanations following all required data.

# DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Accounts 403, 404, 405) (Except amortization of acquisition adjustments)

- 1. Report in Section A for the year the amounts for: (a) Depreciation Expense (Account 403); (b) Amortization of Limited-Term Electric Plant (Account 404); and (c) Amortization of Other Electric Plant (Account 405).
- 2. Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute the charges and whether any changes have been made in the basis or rates used from the preceding report year.
- 3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.

Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any subaccounts used.

In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional

classifications and showing a composite total. Indicate at the bottom of Section C the manner in which column (b) balances are obtained. If average balances, state the method of averaging used.

For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant.

If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.

4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of Section C the amounts and nature of the provisions and the plant items to which related.

DISTRIBUITION OF SALABIES AND WACES						

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may he used

COMMON UTILITY PLANT AND EXPENSES						
1. Describe the property carried in the utility counts as common utility plant and show the such plant at end of year classified by accoury vided by Plant Instructions 13, Common Utility the Uniform System of Accounts. Also show the fraction of such plant costs to the respective department the common utility plant and explain the bascation used, giving the allocation factors.  2. Furnish the accumulated provisions for deand amortization at end of year, showing the classifications of such accumulated provisions mounts allocated to utility departments to common utility plant to which such accumulations relate, including explanation of basis or such accumulated.	book cost of its as pro- y Plant, of he allocation nents using is of alio- epreciation amounts and ons, and using the lated provi-	tion and factors used.  3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform Systems of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.  4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

	STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)							
1. Report data for Plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report on this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees				assignable to each plant. 6. If gas is used and purchased on a therm basis, report the Btu content of the gas and the quantity of fuel burned converted to Mcf. 7. Quantities of fuel burned (line 38) and average cost per unit of fuel burned (line 41) must be consistent with charges to expense accounts 501 and 547 (line 42) as shown on line 21. 8. If more than one fuel is burned in a plant, furnish only the composite heat rate for all fuels burned.

- 3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, page 403.
- 4. If net peak demand for 60 minutes is not available, give that which is available, specifying period.

5. If any plant is equipped with combinations of steam, hydro, internal combustion or gas turbine equipment, report each as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

#### TRANSMISSION LINE STATISTICS (Continued)

- 7. Do not report the same transmission line structure twice. Report lower voltage lines and higher voltage lines as one line. Designate in a footnote if you do not include lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g).
- 8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If
  such property is leased from another company, give
  name of lessor, date and terms of lease, and amount of
  rent for year. For any transmission line other than a
  leased line, or portion thereof, for which the
  respondent is not the sole owner but which the
- respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
- 9. Designate any transmission line leased to another company and give name of lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
- 10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

May not cross-check due to rounding.

Total depreciation reserve for electric utility

#### MONTHLY PEAKS AND OUTPUT

E-29

 Report hereunder the information called for pertaining to simultaneous peaks established monthly (in thousands of kilowatts) and monthly output (in thousands of kilowatt-hours).

Monthly peak col. (b) should be respondent's maximum kw. load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange. minus temporary deliveries (not interchange) of emergency power to another system

3. State type of monthly peak reading (instantaneous (0), 15, 30, or 60 minutes integrated).

4. Monthly output should be the sum of respondent's net generation for load and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line 23 on page E-28.

5. If the utility has two or more power systems not physically connected, the information called for below should be furnished for each system.

	 		Monthly peak			] }	16   17

Report data by plant units where that is available, using one column for each unit's data and one for total plant. If multiple coals of differing characteristics (heating value, % sulfur, etc.) are co-fired in the unit in significant amounts, use multiple columns to report the requested data for each type coal.
